## PRODUCT INFORMATION

<b>Material</b>	Coating: Nitrile Liner: HPPE
<b>Colour</b>	Blue
<b>Packaging</b>	10 pairs per pack / 100 per case
<b>Sizes</b>	7-10

## CERTIFICATION

Washing Instructions : Gloves can be washed in a conventional washing machine, with a setting of 40 °C Centigrade or lower using a non Biological washing powder.  
 The gloves should be dried at room temperature; leaving them out to dry (drip-dry).  
 Caution: drying by mechanical means with temperatures over 40 °C (Centigrade) may damage the fibre and reduce the cut level resistance, and may also shrink the glove.  
 Cut resistance is maintained up to 3 washes if dried below 40 °C.
